Service Name	Service Description	Unit of Measure	Retail Cost	Discount % Off	DIR Customer Price
AWS Security Essentials	This course covers fundamental AWS cloud security concepts, including AWS access control, data encryption methods, and how network access to your AWS infrastructure can be secured. Based on the AWS Shared Security Model, you learn where you are responsible for implementing security in the AWS Cloud and what security-oriented services are available to you and why and how the security services can help meet the security needs of your organization.	Per Course	\$695.00	40%	\$420.13
AZ-500T00 Microsoft Azure Security Technologies	In this course students will gain the knowledge and skills needed to implement security controls, maintain the security posture, and identify and remediate vulnerabilities by using a variety of security tools. The course covers scripting and automation, virtualization, and cloud N-tier architecture.	Per Course	\$2,495.00	40%	\$1,508.23
Certified Cloud Security Professional (CCSP)	The goal of the course is to prepare professionals for the challenging CCSP exam by covering the objectives of the exam based on the six domains as defined in the (ISC)2 CCSP common body of knowledge.	Per Course	\$4,549.00	40%	\$2,749.87
Certified Information Security Manager (CISM)	In this course, students will establish processes to ensure that information security measures align with established business needs.	Per Course	\$1,995.00	40%	\$1,205.98
Certified Information Security Systems Professional (CISSP)	In this course, students will expand upon their knowledge by addressing the essential elements of the 8 domains that comprise a Common Body of Knowledge (CBK)® for information systems security professionals.	Per Course	\$3,395.00	40%	\$2,052.28
Certified Information Systems Auditor (CISA)	In this course, students will evaluate organizational policies, procedures, and processes to ensure that an organizations information systems align with its overall business goals and objectives.	Per Course	\$3,250.00	40%	\$1,964.63
Check Point Cyber Security Administrator	The goal of this course is to provide an understanding of basic concepts and skills necessary to configure Check Point Security Gateway and Management Software Blades.	Per Course	\$3,000.00	5%	\$2,871.38
Citrix (Netscaler) ADC 12.x Advanced Concepts - Security, Management and Optimization	Learn how to configure your Citrix networking environment to address application services security requirements with Citrix Web App Firewall; automate and manage network services for scale-out of application architectures with Citrix Application Delivery Management; and optimize Citrix ADC-managed application delivery traffic. This five-day course for experienced Citrix networking architects, engineers and administrators will teach you to deploy and manage Web App Firewall to protect web applications against different types of attacks. It will also give you a practical understanding of Citrix Application Delivery Management capabilities for centralized management of multiple Citrix ADC platforms, orchestration of changes, transaction reporting, infrastructure visualization and planning.	Per Course	\$5,000.00	5%	\$4,785.63
Citrix Virtual Apps and Desktops 7 Advanced Deployment, Troubleshooting, Security and Administration	Designed for experienced IT professionals this course builds on the foundational implementation and management skills introducing scalability, redundancy and security configurations.	Per Course	\$5,000.00	5%	\$4,785.63
COBIT 2019 Foundation	COBIT 2019 builds on and integrates more than 25 years of development in this field, not only incorporating new insights from science, but also operationalizing these insights as practice. The heart of the COBIT framework updates COBIT principles while laying out the structure of the overall framework including: New concepts are introduced and terminology is explained—the COBIT Core Model and its 40 governance and management objectives provide the platform for establishing your governance program. The performance management system is updated and allows the flexibility to use maturity measurements as well as capability measurements.	Per Course	\$1,330.00	40%	\$803.99
CompTIA Cybersecurity Analyst (CySA+)	The course introduces tools and tactics to manage cybersecurity risks, identify various types of common threats, evaluate the organization's security, collect and analyze cybersecurity intelligence, and handle incidents as they occur.	Per Course	\$2,495.00	40%	\$1,508.23

CompTIA Penetration Tester+ (PenTest+)	Security remains one of the hottest topics in IT and other industries. It seems that each week brings news of some new breach of privacy or security. As organizations scramble to protect themselves and their customers, the ability to conduct penetration testing is an emerging skill set that is becoming ever more valuable to the organizations seeking protection, and ever more lucrative for those who possess these skills. In this course, you will be introduced to some general concepts and methodologies related to pen testing, and you will work your way through a simulated pen test for a fictitious company.	Per Course	\$3,295.00	40%	\$1,991.83
CompTIA Security+ Certification	In this course, students will build on their knowledge of and professional experience with security fundamentals, networks, and organizational security as you acquire the specific skills required to implement basic security services on any type of computer network.	Per Course	\$2,495.00	40%	\$1,508.23
CRISC Certified In Risk and Information Systems Control	The CRISC course is designed for those who have experience with risk identification, assessment, and evaluation; risk response; risk monitoring; information systems control design and implementation; and information systems control monitoring and maintenance.	Per Course	\$2,037.00	40%	\$1,231.37
CyberSec First Responder-Threat Detection & Response	This course covers the duties of those who are responsible for monitoring and detecting security incidents in information systems and networks, and for executing a proper response to such incidents.	Per Course	\$3,495.00	40%	\$2,112.73
EC-Council Certified Application Security Engineer (CASE).net	The Certified Application Security Engineer (CASE) credential is developed in partnership with large application and software development experts globally. The CASE credential tests the critical security skills and knowledge required throughout a typical software development life cycle (SDLC), focusing on the importance of the implementation of secure methodologies and practices in today's insecure operating environment.	Per Course	\$2,097.00	5%	\$2,007.09
EC-Council Certified Chief Information Security Officer (C-CISO)	In this course, students will learn in-depth content in each of the 5 CCISO Domains	Per Course	\$3,495.00	5%	\$3,345.15
EC-Council Certified Ethical Hacker (CEH)	CEH provides an in-depth understanding of ethical hacking phases, various attack vectors, and preventative countermeasures. It will teach you how hackers think and act maliciously so you will be better positioned to setup your security infrastructure and defend against future attacks.	Per Course	\$3,495.00	40%	\$2,112.73
EC-Council Certified Network Defender (CND)	Certified Network Defender (CND) is a vendor-neutral, hands-on, instructor-led comprehensive network security certification training program. It is a skills-based, lab intensive program based on a job-task analysis and cybersecurity education framework presented by the National Initiative of Cybersecurity Education (NICE).	Per Course	\$3,495.00	40%	\$2,112.73
EC-Council Computer Hacking Forensics Investigator (CHFI)	This course will provide participants the necessary skills to identify an intruders footprints and to properly gather the necessary evidence to prosecute in the court of law.	Per Course	\$3,495.00	40%	\$2,112.73
Implementing and Operating Cisco Security Core Technologies (SCOR)	In this course, Implementing and Operating Cisco Security Core Technologies (SCOR), students will master the skills and technologies needed to implement core Cisco security solutions to provide advanced threat protection against cybersecurity attacks. Students will learn security for networks, cloud and content, endpoint protection, secure network access, visibility and enforcements.	Per Course	\$4,295.00	5%	\$4,110.85
NIST Cyber Security Professional (NCSP) Foundation	This course is targeted at IT and Cybersecurity professionals looking to become certified on how to operationalize the NIST Cybersecurity Framework (NCSF) across an enterprise and its supply chain.	Per Course	\$2,295.00	20%	\$1,849.77
NIST Cyber Security Professional (NCSP) Practitioner	This course is targeted at IT and Cybersecurity professionals looking to become certified on how to operationalize the NIST Cybersecurity Framework (NCSF) across an enterprise and its supply chain.	Per Course	\$3,995.00	20%	\$3,219.97
Red Hat Security - Linux in Physical, Virtual	This course is ideal for security administrators and system administrators who need to manage the secure operation of servers running Red Hat® Enterprise Linux®, whether deployed on physical hardware, as virtual machines, or as cloud instances.	Per Course	\$4,700.00	5%	\$4,498.49
Understanding Cisco Cybersecurity Operations Fundamentals (CBROPS)	The Understanding Cybersecurity Operations Fundamentals (CBROPS) v1.0 course teaches an understanding of the network infrastructure devices, operations, and vulnerabilities of the Transmission Control Protocol/Internet Protocol (TCP/IP) protocol suite.	Per Course	\$4,295.00	5%	\$4,562.79

Self-Paced On Demand training is available online 24 hours a day, 7-days a week. Libraries can be purchased individually or in bulk. Customized learning plans can be built for each of your individual employees as well. This product offers the lowest entry cost to maximize your investment.
